Trying to do the heater leader around the world ...

海得利电气(中国)有限公司
HEATLE ELECTRIC (CHINA) CO., LTD.

企业简介

海得利电气（中国）有限公司座落于素有“三省通衢”之美誉的安徽省广德县经济开发区，合杭高速、宣杭铁路复线、318国道和3条省道穿境而过，交通便捷，运输发达。

公司创建于2011年，由美国海得利电气有限公司、香港海狮电热集团有限公司、温州久胜电气制造有限公司共同出资合办。注册资金1000万元，投资8000万元，是一家集科研、开发、生产、销售为一体的大型综合性民营企业。

公司专业生产电热系列，电热电缆、矿物绝缘发热电缆、地暖电热、测温偶、金属软管、不锈钢挠性连接管、塑料波纹管等，产品广泛应用于：石油、化工、钢铁、机械、电力、仪表、航空、汽车、火车、橡胶、塑料、医疗、通讯、食品、家电等各个领域，产品已出口世界30多个国家及地区。公司致力于以优质的产品质量和实惠的价格赢得市场，公司前身于2003年至2005年度均为市人民政府评为明星企业，并于2006年一致通过ISO9001：2000质量管理体系认证、IQNET组织认证、CNAB组织认证、CQC组织认证、CE产品质量认证企业、ROHS欧盟绿色认证及中国质量认证中心认证企业、国际认可论坛和太平洋认可合作组织质量管理体系多边承认协议成员认可。公司自成立至今均被国家商品监督中心评为3.15产品质量、服务质量无投诉用户满意品牌，被视为最具有发展潜力的企业之一。

公司拥有国际领先的生产流水线和检测设备，严格按照国家标准和国际标准组织生产，从原材料购进到成品出库实行全程质监控制。制定“以客户需求为中心，以生产管理为基础，持续改进质量体系，提供用户满意产品”的发展方针。愿向广大客户提供先进的技术、精良的产品、诚信的交货和便捷的服务。以打造著名民族品牌为己任，顽强拼搏，日夜奋战，竭尽全力精心打造各类产品，携手与广大国内外客户单位共创最美好明天！

公司承诺：以质量为前提的基础上，坚持用户至上、质量第一、信誉第一、价格实惠。

公司宗旨：面向全国，走向世界。

每项电热方面的需求，都离不开众望所归的行业专家

---海得利

Each electric needs, are inseparable from
the unanimous choice of industry experts

--HEATLE

Company Introduction

China Heatle electric co., Ltd is located in known as the “reputation of the three provinces thorough fare ,Guangde County, Anhui Province Economic Development Zone, co-Hangzhou Expressway, declared Hangzhou Railway,318 National Highway and Provincial Highway 3 to wear on the boundary, and convenient transportation.

China Heatle electric co., Ltd is founded in 2011,it is a jointly venture company by American Heatle electric co., Ltd, Hong Kong Haishi Electric Co., Ltd, Wenzhou Jiusheng Electric Manufacturing Co., Ltd. The registered capital of 10 million RMB, 80 million RMB of investment, it is a joint-stock enterprises and an integration of scientific research, development, production and sale.

The company specializes in the production of electric series, electric cable, MI heating cables, the ground heating electric, temperature measurement, flexible heater tube, plastic film capacitor and so on. The products are widely used in various fields of petroleum, chemical, steel, machinery, electric, instrumentation, aerospace, automobiles, trains, rubber, plastics, medical, communications, food, home appliances and others, and these have been exported to over 30 countries and regions in the world

Company owns the international advanced production line and testing equipment, in strict accordance with national and international standards organization production, from raw material purchase to finished products ,we have full of quality and technical supervision control library. Establish the developing policy of customer demand as the Center, to production management based on the continuous improvement of quality management system, provides customer satisfaction product. And we are willing to provide our customers with advanced technology, excellent products, honest and convenient delivery service. To create a family of famous name brand as our mission, tenacious struggle, fight day and night, to make every effort to make all kinds of products, together with General domestic and foreign customers to create a better tomorrow!

Company commitment: subject to the basis of best quality, we adhere to customer first, quality first, credit first, reasonable price.

Company tenet: face the nation, to the world.

F 电伴热带系列 Electric tracing band series

- 01. Low-temperature series of electricity partner tropics-----F03
- 02. Medium temperature series of elecplicity partner tropics-----F04
- 03. High-temperature series of electricity parther tropics-----F05
- 04. The series of electricity partner tropics for fire use only-----F05
- 05. Constant output electricity partner tropics-----F06
- 06. High-temperature constant output electricity partner tropics--F06
- 07. Ship electricity partner tropics-----F07
- 08. Special attachment for electricity partner tropics-----F07
- 09. Fiberglass electricity parther tropics-----F08
- 10. Silastic electricity parther tropics-----F08
- 11. Other accessories series-----F09
- 12. PVC heating wire of the floor heating system-----F10

G 矿物绝缘电缆系列 Mineral insulated cable series

- 01. Conventional stainless steel heating cable-----G03
- 02. Armoured thermocouple wire-----G05
- 03. Thermocouple Element-----G06
- 04. Mineral insulated cables technology parameters-----G07
- 05. Intermediate Connector Series Show-----G10

H 高温线系列 High temperature ture wire series

- 01. Ordinary high temperature line (400 °C)-----H01
- 02. The pure silica gel high temperature line (200 °C)-----H01
- 03. 500°C high temperature wire-----H01
- 04. Nickel high temperature wire (600 °C)-----H02
- 05. Metal weaving high temperature line (400 °C)-----H02
- 06. Common PTFE high temprerature wire (200 °C) -----H02
- 07. PTFE extrusion temperature line (320 °C)-----H03
- 08. PTFE around bag high temperature line (350 °C) -----H03

I 热电偶延长导线和补偿导线 Extension and Compensating Cables for Thermocouples

- 01. Single wire compensation HS-BC-11(Fiber glass)-----I01
- 02. Single wire compensation HS-BC-12(PTFE 200°C)-----I01
- 03. Single wire compensation HS-BC-13(PTFE 280°C)-----I01
- 04. Double wire compensation HS-BC-21(inter fiber glass+outer fiber glass)-----I02
- 05. Double wire compensation HS-BC-22(inter fiber glass+metal braid sleeve)-----I02
- 06. Double wire compensation HS-BC-23(inter PEFE+outer PTFE)-----I03
- 07. Double wire compensation HS-BC-24(inter PTFE+outer SS304)-----I03
- 08. Double wire compensation HS-BC-25(inter PTFE+outer kapton)-----I04
- 09. Double wire compensation HS-BC-26(inter kapton+outer kapton)-----I04
- 10. Double wire compensation HS-BC-27(inter PVC+outer PVC)-----I05
- 11. Three layers of wire compensation(inter glass yam+mid glass yam+outer glass yam)-----I06
- 12. Three layers of wire compensation(inter glass yam+mid glass yam+outer SS304)-----I06
- 13. Three layers of wire compensation(inter glass yam+glass sick+mid glass yam+outer SS304)-----I07
- 14. Three layers of wire compensation(inter PVC+mid PVC+outer SS304)-----I07
- 15. Three layers of wire compensation(inter PVC+mid SS304+outer PVC)-----I08
- 16. Four layers of wire compensation(inter glass yam+mid glass yam+outer glass yam+the outermost layer of SS304) ---I08

J 软管系列 Hose series

- 01. Plastic corrugated pipe-----J01
- 02. SM tast tie-in-----J01
- 03. RQW1 right-angle elbow-----J01
- 04. RQS fixed nog-----J01
- 05. Plastic tube-----J01
- 06. Galvanized hose-----J02
- 07. Stainless steel hose-----J02
- 08. The general connecting wire-----J02
- 09. The general silk (nickel plating type) connector-----J02
- 10. Card set of type joint-----J02
- 11. General connecting wire inside-----J02
- 12. Since the solid type joint-----J02

电伴热带系列

- 10. Silastic electricity parther tropics-----F08
- 11. Other accessories series-----F09
- 12. PVC heating wire of the floor heating system-----F10

永恒的功率
不变的电阻
高品质的发热电缆

Eternal power
Constant resistance
High quality heating cable

HEATLE发热电缆产品满足诸多不同领域对温度的需求，如：石化、天然气、石油、化工、电力、医疗、商业建筑、食品加工生产线、室内采暖、道路化雪、养殖业采暖工程等领域。

HEATLE发热电缆确保许多工程不因受冻而造成的经济损失，利用及其可靠的先进技术解决各领域用户的困难，为客户群体降低成本，提高生产效率及产品质量。

HEATLE的客户遍布全球，争创世界领先品牌。

HEATLE发热电缆可根据客户需求，分为三种：

- ①电伴热带、玻纤电伴热带、硅橡胶电伴热带
- ②不锈钢发热电缆、铜发热电缆
- ③地暖系统发热电缆

HEATLE's heating cable meet the different fields on temperature demand, majoring in petrifaction, natural gas, petroleum, chemical industry, electricity, medical treatment, commercial building, Food processing production line, indoor heating system, road snow melting, livestock breeding heating project etc.

HEATLE's heating cable ensure that the many works do not lead to economic losses due to cold, take advantage of reliable and advanced technology to solve the difficulties of the users in different field, reduce costs for the customer, improve production efficiency and product quality

HEATLE's customers spread all over the world, create the world's leading brands

According to the demand of the customer, HEATLE's products divided into three kind:

- ①electricity partner tropics, fiberglass electricity partner tropics, silicon rubber
- ②stainless steel heating cables, copper heating cable
- ③floor heating system heating cable

电伴热带、玻纤电伴热带、硅橡胶电伴热带

在每根电伴热带内，母线之间的电路数随温度的影响而变化，当电伴热带周围的温度变冷时，导电塑料产生微分子的收缩而使碳粒连接形成电路，电流流经这些电路，使电伴热带发热。

当温度升高时，导电塑料产品微分子的膨胀，碳粒渐渐分开，引起电路中断，电阻上升，电伴热带自动减少功率输出。

当周围温度变冷时，塑料又恢复到微分子收缩状态，碳粒相应连接起来形成电路，点伴热带发热功率又自动上升。

HEATLE电伴热带控制的温度不会过高亦不会过低，温度是自动调节的。

特点：

- ①当管道或其他应用物表面温度较低时，能在短时间内快速启动。
- ②达到一定温度功率自动降低，节省运行成本。
- ③所安装电伴热带的管道前后温度均匀。
- ④可以切成任意长度，根据实际需要做调整，安装简单。

⑤维护简单。

自控电伴热带结构图：

Construction of the Self-control electricity partner tropics

Electricity partner tropics,fiberglass electricity partner tropics, silicon rubber :

In each electricity partner tropics, the circuits between bus cks varies with temperature, when the temperature around the electricity partner tropics are cold, conductive plastic micro molecular contraction and carbon particles are connected to form a circuit, when the electric current through circuit, electricity partner tropics generate heat.

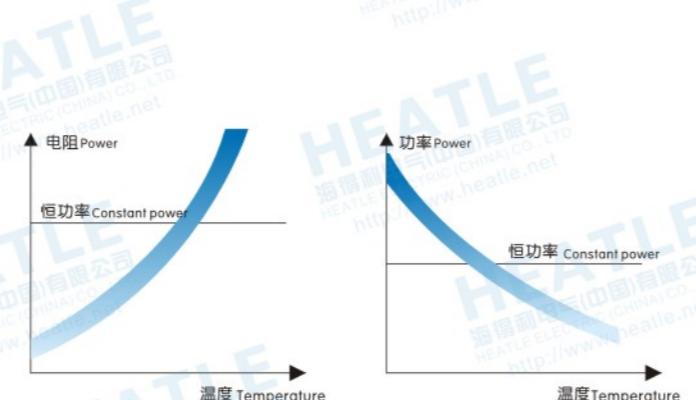

When the temperature raised, carbon particles gradually separated due to the Micro-molecular expansion, cause the circuit interrupt, and resistance rised, then electricity partner tropics automatically reduce the power output.

When the temperature cool down, plastic returned to the micro molecular contraction, carbon particles connected together to form a circuit, then electricity partner tropics automatically rise the power output.

The temperature of HEATLE's electricity partner tropics changes automatically

Traits:

- 1: When the temperature of the pipeline too low, electricity partner tropics can quick start in a short time
- 2: when reaches a critical temperature power reduced automatically, and save costs
- 3: uniform temperature before and after the pipeline of the electricity partner tropics
- 4: can cut to any length, adjust according to actual needs, simple in installation
- 5: simple in maintenance

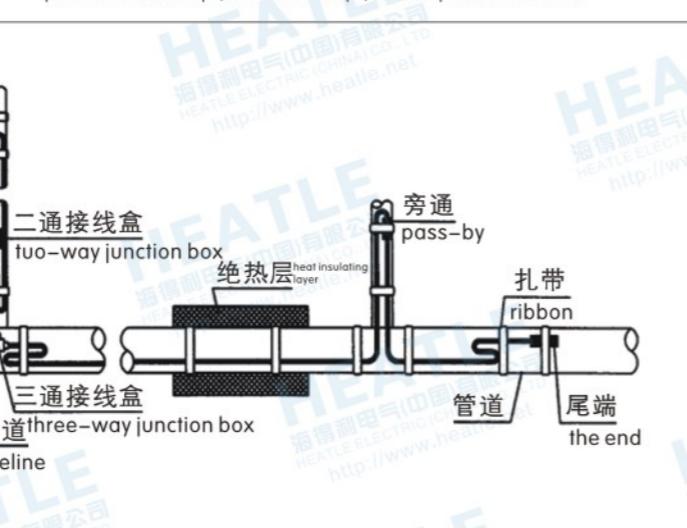

电伴热带随温度变化的情况:温度上升时，电阻增加功率减小，温度下降时，电阻减小功率增大。

The state of the electricity partner tropics with the temperature changes:
When the temperature rised, resistance increase and power decrease.
When the temperature decreased, resistance decrease and power increase.

schematic drawing of electricity partner tropics :

every electricity partner tropics equipped with a power junction box and an end. The quantity of the two-way junction box and three-way junction box choosed based on the actual situation of the pipeline. Also equipped with distribution case, heat-resistant pressure-sensitive tape, aluminum foil tape, steel hoop and Notices label.

玻璃纤维电热带
fiberglass electricity partner tropics

玻璃纤维电伴热带是为了解决管道、罐体、槽池、阀门等的高温伴热或局部加热而设计制造的，其绝缘材料采用玻璃纤维，柔软性好，可直接缠绕被加热部位的表面，发热快，热效率高。

Fiberglass electricity partner tropics designed for solving the high temperature heating or local heating of the pipeline, tank body, slot pool, valve and so on. The insulating materials adopt fiberglass of flexibility, it can Wrapped the surface of the heated part, fever fast and high thermal efficiency.

硅橡胶电热带(常规规格如下表)
silastic electricity partner tropics

硅橡胶电热带防水防烫性能好，可用于潮湿环境，该产品主要是有镍铬合金热电丝和硅橡胶高温绝缘布组成。它发热快、温度均匀、热效率高、强度高、安全寿命长，不同功率的产品具有统一的外观和安装尺寸，使用非常方便。

适用 appliance	<p>耐热压敏胶带又称固定胶带，是在玻璃纤维带基础上涂复特殊粘剂后形成的一种胶粘带，该带宽20mm, 厚0.1~0.3mm, 长度20m, 耐热250°C。在电伴热系统中，电热带安装后，用该耐热胶带沿管道径向将电热带定牢，其配备长度视伴热管直径和长度而定。</p> <p>Heat-resistance and pressure-sensitive adhesive belt also called Fixed tape. It is a adhesive tape formed after spread special adhesive on the fiberglass. 20mm wide, 0.1~0.3mm thick, 20m long, the maximum withstand temperature is 200° C. In the system of the electricity partner tropics, after fix electricity partner tropics, use Heat-resistance and pressure-sensitive adhesive belt to fixed the electricity partner tropics along the pipeline, the length is depend on partner tropics's length and diameter.</p>	<p>该宽度为20mm, 厚度0.1~0.3mm, 长度20m, 耐热250°C。</p> <p>20mm wide, 0.1~0.3mm thick, 20m long, the maximum withstand temperature is 250° C</p>	<p>铝胶带系薄铝胶带涂复特殊的胶粘剂后的一种胶粘带。该带宽50mm, 厚0.1~0.3mm, 在电伴热系统中主要用于固定电热带，固定温控器的毛细管和感温包，或者用于挠性电热板的辅助固定，其作用除能方便电热带产品安装固定外，主要是能增大散热面，有利于热传导。</p> <p>aluminium adhesive belt is a adhesive tape formed after spread special adhesive on the thin aluminum. 50mm wide, 0.1~0.3mm thick, it used for fixed electricity partner tropics and parts of the temperature controller in the system of the electricity partner tropics.</p>	<p>喉卡由10mm宽1.0mm厚的不锈钢带及固定卡扣组成。它可以将电热带接线盒等附件固定在管道上。钢带可根据管径大小，按实际需要长度剪切。安装时，调节固定卡扣，即能将接线盒或其他附件固定在管道上，没圈钢带长度是所固定管道外周长的1.1~1.2倍。</p> <p>The riser card is made of 10mm wide, 1.0mm thick's Stainless steel strip and retaining tabs, it used for fix the attachments on the pipeline. The length of the steel belt depend on the diameter of the pipeline. when install, adjust the retaining tabs, fix the attachments on the pipeline.</p>

地暖系统发热电缆

地热系统属于低温辐射供暖，热量从地面徐徐升上，为您带来足部温暖、头部清新的舒适感受。同时，它避免了传统供暖方式气流带动粉尘在室内飞扬的问题。

依靠精确的温控器对地面系统进行控制，在客户期望的舒适度和较低的使用费用之间达到最佳平衡。

传统供暖方式，用户不能自己调节温度，而HEATLE地暖系统则可以根据个人需要调节房间温度，真正做到人性化取暖。HEATLE凭借其温控器的精确性，在不影响舒适度的情况下降低平均温度1~3℃，节约10~20%的能量。

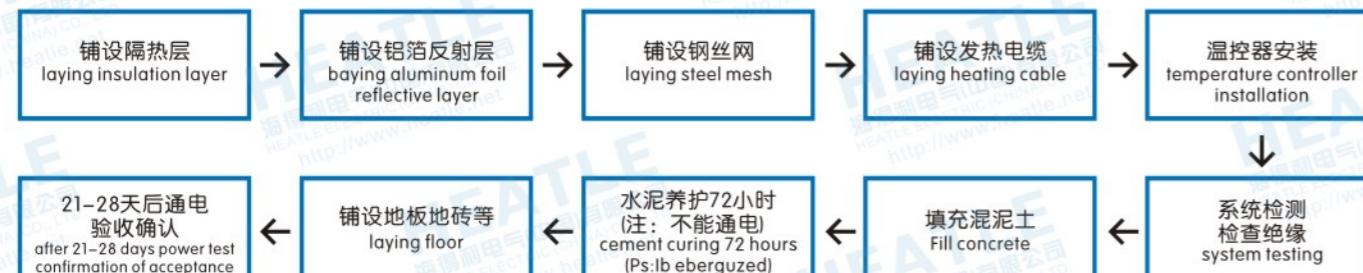

地暖系统发热电缆实际安装图
The actual installation of floor heating system heating cable

地暖系统施工流程Construction process of floor heating system

安装之前，确认施工图纸，预留温控器位置，地面平整保持干净。工作现场具备水电供应。

Before installation, pls confirm construction drawing reserve positring for temperature controller, keep ground clean work site need supply water and electricity

矿物绝缘不锈钢发热电缆、铜发热电缆

矿物绝缘发热电缆是由金属线芯(发热体)、线芯周围紧密环绕着矿物绝缘层(氧化镁)及经过多次拉制过的金属管(通常是不锈钢、铜、316L等)构成,必要时,可在金属护套外挤包一层塑料护套或低烟无卤外护套。

矿物绝缘发热电缆适用于工业或建筑领域的防冻及工业介质的保温盒升温。尤其是需要高输出功率或者需要承受高温蒸汽吹扫的管道,在要求防腐防爆的环境中,MI矿物绝缘发热电缆更能显现优良特性。

矿物绝缘发热电缆具有如下特征

- ①因加热电缆全部由不燃烧的无机物组成,所以产品防火、阻燃,不释放有毒气体,零燃烧能。
- ②加热电缆本身的使用温度极限就是组成线芯及金属外护套层所承受的最高温度,工作温度等级高,最高可承受800℃高温。
- ③绝缘层为氧化镁,线芯及护套由金属构成,从根本上解决了老化问题,最大程度的延长了电缆的使用寿命。
- ④产品采用不同外套管能耐油类、溶剂及大多数酸类的侵蚀。具有良好化学稳定性,耐太阳辐射及抗核辐射。
- ⑤技术护套防爆性能及电磁屏蔽性能优异,可兼做接地回路。
- ⑥机械性能好,因其结构坚固,可耐扭绞、挤压、弯曲、拉、摩擦及一般的粗重搬运。
- ⑦采用串联电阻型电热元件,因此发热均匀,全长温差极小,其发热功率大,一般为30~200W/m之间。
- ⑧矿物绝缘加热电缆在安装时禁止交叉和从重叠使用,MI冷端接头禁止弯曲,且冷端及接线盒应放在保温层外面。

产品分类

根据外护套材料不同MI加热电缆分为：
铜护套矿物绝缘加热电热-(M9CU)

铜镍合金护套矿物绝缘加热电缆-(M9CN)

不锈钢护套矿物绝缘加热电缆-(M9SS)

825合金护套矿物绝缘加热电缆-(M9AL)

product classification

According to the material of the different outer case, MI heating cable can be divided into

M9CU

M9CN

M9SS

M9AL

典型应用领域

石油化工：苯、苯乙烯、苯二醛、乙二酸、丙二醇、氯、尼龙、合

成纤维、树脂等工艺管线和容器。

炼油：原油管线；

蜡、沥青、重油、渣油、蒸馏、绿化裂解、硫、焦化等管线；

气体管线房冷凝；催化剂气化反应堆预热；

液化石油气和天然气储罐防霜冻。

电力：高压给水、高压冷凝、排污放气、蒸汽、仪表、酸碱和重油

点火油路、核电站堆设备和螺旋加热器。

冶金：高温输送管线、锅炉前管道工程。

制药：油脂、软管、油霜。

application zone

Petrochemicals: process pipeline and container of benzene, styrene, phthalaldehyde, dicarboxyl, propanediol, chlorine, nylon, synthetic fiber and resin

oil refining: crude oil pipeline

wax,pitch, heavy oil, residual oil, distill, Green cracking, sulphur, coking and so on

Gas pipelines room condensation, Catalyst for the gasification reactor warm-up

Liquefied petroleum gas and natural gas storage tank frost

electric power: High-pressure watersupply, High-pressure condensate, drain contamination and blowdown, steam and so on

metallurgy: High temperature pipelines, pipe work

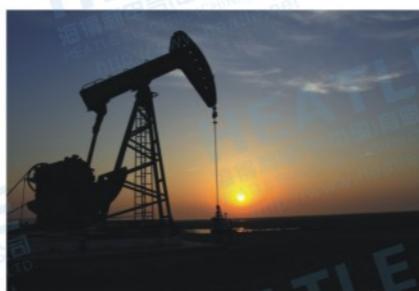

pharmacy: oil, hose, oil bloom

管道 Pipeline

电厂 Power plant

石油 Oil

家居 Household

技术细节(金属发热电缆) Technical details (metal heating cable)

外层材质 the material of outer layer	不锈钢/铜/铜镍合金/825合金..... stainless steel/copper/copper-nickel alloy 1825 alloy
绝缘材质 insulation maerial	氧化镁 magnesia
导芯材质 conductive core material	电热丝 heating wire
电压 voltage	220V/380V
长度 withstand voltage	1m~2000m
绝缘电阻 insulation resistance	1000MΩ/Km
泄漏电流 electric cuwent leakage	≤3mA/100A
安装温度 installing current	≥-60°C
最小半径 the minimum diameter	外径的6倍 six times than the out diameter
排布最小间距 the minimum distance	25mm

铠装偶丝 Armoured thermocouple wire

铠装偶丝(铠装丝),国际上称为MI电缆,是制造铠装热电偶的材料。分度号有K、E、N、T、J、S、R、B,外直径从0.5~10.8,外套管材料有:321、SUS310(2520)、SUS316、304、GH3030、INCONEL-600,最高使用温度1300°C。铠装偶丝(铠装丝)的详细介绍铠装偶丝(铠装丝),国际上又称之为无机物绝缘热电偶电缆,是由不锈钢保护管(1)、氧化镁绝缘粉(2)、热电偶丝材(3)组合后经模具压实的坚实整体,具有耐压、抗震、可挠、小型化、热响应时间快等优点,是制造铠装热电偶的核心材料。

MI cable is the material manufactured thermocouple.The model indexing have K、E、N、T、J、S、R、B.The outer diameter from 0.5 to 10.8. The outer sheath materials have 321.SUS310(2520).SUS316.304.GH3030.INCONEL-600,the max temperature used is 1300°CInternationally,also known as mineral insulated thermocouple cable which is protected by a stainless steel tube(1),Mgo insulation powder(2),thermcouple wire(3) after die compaction of combined sold overall.it has pressure,seismic,flexible and miniaturization,thermal response time ect.the core material for manufacture of thermocouple.1.product name,model indexing,the jacket tube material and the use of temperature.

安装示意图Installation drawing

项号 Item number	敷设方式示例 Example of laying approach	说明 Explanation
1		单芯或多芯电缆-固定敷设在木墙上 Single-core or multi-core cables Fixed on a wooden wall
2		单芯或多芯电缆-固定敷设在砖墙上 Single-core or multi-core cables Fixed on a brick wall
3		-直接固定在木质的天花板下 Directly fixed under a wooden ceiling
4		-敷设在无孔托盘上 Laid on a tray without holes
5		-敷设在有孔托盘上 Laid on a tray with holes
6		-敷设在托架或金属网上 Laid on a supporter or metal net
7		-敷设在梯架上 Laid on a scarment
8		-吊装在悬索上 Hung on a suspension line
9		-电缆直埋在砖石墙内 Vertically buried in a brick wall
10		-电缆敷设在墙内或天花板的线槽里 Laid inside a wall or notch in the ceiling

1.矿物绝缘电缆防火

矿物绝缘电缆由于氧化镁组成材料全都是用无机物，不但本身无法自燃，更不会引发火灾。这从根本上决定了电缆不可能燃烧或助燃。因此在火灾情况下仍然可以继续运行，保持了供电。火灾消除后电缆无需更换。这是一种真正意义上的防火材料。

2.安全环保

电缆内的材料为无机物（不锈钢、和铜、氧化镁）组成，因而电缆在1000℃以上烧烤，不会对铜、不锈钢有破坏性。在高温下燃烧也不会产生烟雾，如卤素是有毒性气体。矿物电缆是真正意义上无烟无毒，无二次灾害污染，实现绿色环保安全产品。

3.过载能力强，流量大

对于相同过载截面的电缆而言，橡胶塑料电缆因流量大而引发绝缘发热、老化、或击穿燃烧。矿物绝缘电缆与普通电缆相比电流过载能力提高2-3倍。如过载发热达不到熔的熔点温度，电缆时不会受损的，电缆内的氧化镁遇到高温时不会形成碳化。过载消除后的电缆性能不会产生变化仍可继续正常使用。

4.屏蔽性能好

矿物绝缘电缆铜护套和不锈钢铜护套是最佳的屏蔽保护层。可以防止电缆本身对其他线缆干扰，又可以阻止外界电磁场对自身干扰。

5.耐机械磨损：矿物绝缘电缆坚固耐用，可经受剧烈的外力敲打、撞击、挤压而不会损害其通电性能，在电缆外径压扁至原来的三分之一的时候仍可以正常工作。电缆一般不需要附加的机械保护。

6.防水

由于矿物绝缘电缆采用无缝钢管，不锈钢无缝管，终端连接采用密封又可以长期浸泡水中使用。喷水救火时，不会漏电，能正常供电。

7.耐高温

考虑到使用寿命，矿物绝缘电缆正常连接工作温度为250℃以下。实际上，它可以在950℃温度正常工作3小时以上，甚至在接近铜的熔点1083℃的温度短时工作，而氧化镁绝缘材料在这样的温度下是不会发生任何性质变化。不锈钢矿物绝缘电缆正常工作400℃以下，在100℃温度可以连续运行供电，不锈钢熔点为1450℃，内材质氧化镁熔点2800℃。

8.防爆

矿物绝缘电缆时采用无缝钢管和不锈钢无缝管做外护套，紧密压实的氧化镁绝缘材料和铜

1. Fireproof

The MI cable is made of inorganic materials magnesium oxide, it will neither cause fire nor support combustion. It can keep normal operating even in fire, and there is no need to change it after fire. It is absolute fireproof cable.

2. Safety and environment protection

The material of the cable is mineral, such as stainless steel, copper and mgo..so the copper and stainless steel will not be damaged once the cable works under 1000℃,which will not cause fog, such as halogen the posisnous gas. Mineral insulated is absolute gasless and no poisonus, without second pollution and production protection.

3. High Overload and High Current Rating

At same cross section, rubber plastic cable will heat, age, breakdown to burn because of high current. Compared with general cable, overload capacity of MI cable is enhanced two or three times. If overload and the temperature do not reach the melting point of copper, cable will not be influenced. Magnesium oxide is not carbonised even the temperature is high. After overload being eliminated, capacity of the cable will not change, and it can continue to operate normally.

4. Good shielding effect

Copper sheath and stainless steel of Mineral insulated cable are the best shielding sealer, which not only prevents MI cable from disturbing other cable, but also prevents outside electromagnetism.

5. Resistance to mechanical wear

MI cable solidly in workmanship and durable in use. It can perform well. It can work in gear when its outside diameter is set by additive Mechanical Protection.

6. Waterproof

Because about the seamless copper pipe, stainless steel seamless pipe in cable, adopt the seal and also can immersion in water use in TCP link. It can maintain the normal power supply and will not be leakage when sprinkling and fire-fighting.

7. High temperature resistance

Considering the using life, the nominal continuous working temp-eratherm of the MI cable is below 250 degree. In fact, it can work in the 950C temperature for more than 3 hours, or even near the melting point of copper in the temperature of 1083C for shortterm, while the magnesium oxide insulation material in such a temperature will not be any change in the nature. Stainless steel MI cables work temperature belows 400C degree, can be continuous operation and supply power at 1100C, the melting point of stainless steel is 1450C, and it for the within material magnesium oxide is 2800C.

8. Explosion proof/anti-explosion

芯组成，可经受巨大外界冲击力，并可以阻止蒸汽、气体和火焰到达与电缆连接的电气设备。在化工和易燃易爆环境中可杜绝由电缆引起的连锁爆炸，因此电缆具有防爆特性。

9.耐腐蚀

矿物绝缘电缆时采用无缝钢管和不锈钢本身具有较好的耐蚀性。在大多数情况下。它不需要采取任何附加的保护措施。因此，特别适合化学腐蚀环境和场合敷设的需要。耐在对铜护套有腐蚀的特殊环境中，电缆的外面加一层PVC护套，因些电缆具有较好的耐腐蚀性。

10.电缆外径小

在相同的载流量的条件下，矿物绝缘电缆的外径比其它有机型电缆的外径要小的多，这就意味着对安全敷设以及旧路线的改造带来很大的方便。矿物绝缘电缆和同规格塑料电缆相比，外径要小5%，重量要轻3%，安装时既方便占用空间又小。

11.耐核辐射

由于电缆的全部机构材料均无机材料，经辐射后不会发生任何变化，因此适合应于核辐射的环境。

12.电磁兼容性

矿物绝缘电缆由于其独特的结构特点，对电磁脉冲能提供一个高度的屏蔽效果。

13.弯曲半径小

矿物电缆经充分退火后，具有一般塑料电缆所无法相比的可弯曲性，最小弯曲半径为电缆外径的3-7倍。所以安装方便，减少了线路铺设所占用的空间，适合代替母线槽。

14.接地

矿物绝缘电缆一般不需要单独的接地线，因为电缆的铜护套已经起到了地线的作用，也就是说它比一般的电缆可节省一根地线。在一些场合下，铜护套也作为中线使用。

15.使用寿命长

矿物绝缘电缆全部由无机材料所构成，它不老化，使电缆具有稳定性和长寿命，即使在250℃条件下也可达数百年上，可作为永久性敷设。电缆可如设备移位，线路改进而重新拆装，重复使用。

16.安装方便 美观大方

由于矿特绝缘成品电缆是经完全退火的，所以它有很好的柔韧性，它可弯成任何复杂的形状而不损坏电缆。在电缆安装敷设中，可使用专用工具，施工方便，而且也特别美观。

The MI cable is made up of seamless copper and steel seamless pipe sheath, magnesium oxide powder compacted a tightly solid, it can with stand great external impact and prevent the steam,gas and blaze into the electrical equipment connected with the cable. In the chemical and flamable and explosive environment, eliminating the cable caused by a chain explosion, So it has the quality of explosion proof.

9. Endurance cauterization

The copper and stainless steel which is the material of Mi cable bear better endure cauterization. It need nothing additive protection measures in general instance..So it is specially fitted for using in chemic canker enviroment. The Mi cable may has a PVC coating for using in special enviroment.

10. Small diameter of the cable

Mi cable has the much smaller diameter than other kinds of cable at the same current carrying capacity. So it is very convenience for safety laying and alteration of old cable. Compared with normal plastic cable with the same dimension, Mi cable outer diameter is smaller 5%, the weight lighter 3%,it is easier and occupying smaller space once installing.

11. Endure nucleus radiation

Mi cable is made of inorganic materials, it will not be any changed after nucleus. So it is suitable for using in radiation enviroment.

12. Mi cable has a unique configuration, it can offer a great shied effect to electromagnetism impulse.

13. Small winding diameter

After anneal, mineral insulated cable has the fuction of winding, with which normal cable can not compare. The minimum winding diameter is 3-7 times of outer diameter of the cable, so it is easy to install, which reduces room, and it is adopted to replace generatrix.

14. Earthing

Mi cable is not necessary to use sole earthing, because the copper jacket is the earthing, is can save a earthing to the other kinds of cable, the copper jacket can be used as earthing in some situation.

15. Long Using Life

Mi cable is made up of inorganic materials, it is not easy aged and provided with stability and long using life, even if it is used more than 100 years in 250℃, it can be laid forever, Cable can be equated with shifting elements improving the line and then re-use.

16. Convenience for Installation Beauty and in Good Taste

The finished product of Mi cable has been annealed completely, so it has very good flexibility, it can be bended to figure in any complicated shape, but it is not be attained, it can be laid by special tool convenience, it is very beautiful when be laid on the wall.

PTFE挤出高温线(320℃)PTFE extrusion temperature line (320 °C)
结构(PTFE挤出)Structure (PTFE extrusion)

产品特性:
1.额定温度: -60℃~+320℃
2.额定电压: 600V
3.执行标准: GB/T773A-2000
4.导体: 单根或多股镀锡铜丝或镀银铜丝; 镀镍铜丝或纯镍丝
5.颜色: 红、黄、蓝、白、黑、绿、棕、橙、透明等
6.绝缘体: 聚四氟乙烯(PTFE)
7.用途: 广泛应用于航空、冶金、石油、家用电器、照明灯具、
8.电子电器、仪器仪表、电机、工业机械等高温环境
Product features:
1. The rated temperature: -60 °C ~ +320 °C
2. The rated voltage: 600 V
3. Standards: GB/T773A-2000
4. Conductors: single or more strands of tin copper or silver plated copper wire;
Nickel plated copper wire or pure nickel wire
5. Colors: red, yellow, blue, white, black, green, brown, orange, transparent, etc
6. An insulator: polytetrafluoroethylene (PTFE)
7. Use: widely used in aviation, metallurgy, petroleum, household electric
appliances, lighting equipments,
8. Electronic electric appliances, instruments and meters, motor, industrial
machinery, and other high temperature environment

PTFE绕包高温线(350℃)PTFE around bag high temperature line (350 °C)
结构(PTFE绕包)Structure (PTFE around the bag)

产品特性:
1.额定温度: -65℃~+350℃
2.额定电压: 600V
3.执行标准: GB/T773A-2000
4.导体: 单根或多股镀锡铜丝或镀银铜丝; 镀镍铜丝或纯镍丝
5.颜色: 红、黄、蓝、白、黑、绿、棕、橙、透明、黄绿色等
6.绝缘体: 聚四氟乙烯(PTFE)
7.用途: 广泛应用于航空、冶金、石油、家用电器、照明灯具、
8.电子电器、仪器仪表、电机、工业机械等高温环境
Product features:
1. The rated temperature: 350 °C ~ +65 °C
2. The rated voltage: 600 V
3. Standards: GB/T773A-2000
4. Conductors: single or more strands of tin copper or silver plated copper wire;
Nickel plated copper wire or pure nickel wire
5. Colors: red, yellow, blue, white, black, green, brown, orange, transparent,
yellow-green, etc
6. An insulator: polytetrafluoroethylene (PTFE)
7. Use: widely used in aviation, metallurgy, petroleum, household electric
appliances, lighting equipments,
8. Electronic electric appliances, instruments and meters, motor, industrial
machinery, and other high temperature environment
